MAHAWELI REACH HOTELS PLC
NOTES TO THE INTERIM FINANCIAL STATEMENTS

CORPORATE INFORMATION

INTERIM CONDENSED FINANCIAL STATEMENTS

APPROVAL OF FINANCIAL STATEMENTS

The interim condensed financial statements of the Company for the 03 Months ended 30 June 2016 were authorised for issue by the Board of Directors on 04 August 2016.

BASIS OF PREPARATION

The interim condensed financial statements have been prepared in compliance with Sri Lanka Accounting Standard (SLAS) LKAS 34 - Interim Financial Reporting. These interim condensed financial statements should be read in conjunction with the annual financial statements for the year ended 31 March 2017.

These financial statements quarter ended 30 June 2016 have been prepared on a historical cost basis, except for land and buildings.

SIGNIFICANT ACCOUNTING POLICIES

The changes to accounting policies set out below have been applied consistently to all periods presented in these interim condensed financial statements and in preparing the opening SLFRS/LKAS, unless other indicated.

The presentation and classification of the financial statements of the previous periods have been amended, where relevant, for better presentation and to be comparable with those of the current period.

Finance costs

Finance Income comprise interest income from Staff Loans.

Finance cost comprise interest expense on borrowings.

Financial assets

Initial recognition and measurement

Financial assets within the scope of LKAS 39 are classified as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments and available for sale financial assets, as appropriate and determines the classification of its financial assets at initial recognition. At the reporting date there were no financial assets at fair value through profit or loss, available for sale and held to maturity investments.

All financial assets are recognised initially at fair value plus, in the case of investments not at fair value through profit or loss, directly attributable transaction cost.

The financial assets include cash, trade and other receivables and loans and other receivables.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate method (EIR), less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

The EIR amortisation is included in finance income in the income statement. The losses arising from impairment are recognised in the income statement.

Derecognition

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

The right to receive cash flows from the asset have expired

The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the receivable cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either

(a) the company has transferred substantially all the risks and rewards of the asset, or

(b) the company has either transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all of the risks and rewards of the asset nor transferred control of it, the asset is recognised to the extent of the company's continuing involvement in it.

In the case, the company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained. Continuing involvement that takes the form of guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the company could be required to repay.

Impairment of financial assets

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired.

A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Events that has occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicate there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

Financial liabilities

Initial recognition and measurement

Financial liabilities within the scope of LKAS 39 are classified as financial liabilities at fair value through profit or loss, loans and borrowings, or as derivatives as appropriate and determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognised initially at fair value and in the case of loans and borrowings, plus directly attributable transaction costs.

The financial liabilities include trade and other payables, bank overdrafts, loans and borrowings.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Gains or losses on liabilities held for trading are recognised in the income statement.

The company has not designated any financial liabilities upon initial recognition as at fair value through profit or loss.

Borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in the income statement when the liability are derecognised as well as through the effective interest rate method (EIR) amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in the finance costs in the income statement.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are modified and the modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the income statement. Substantially modified, such an exchange,

Financial risk management objectives and policies

The Company principal financial liabilities comprise of loans, borrowings, trade and other payables. The main purpose of these financial liabilities is to finance the company's operations. The Company has trade and other receivables, and cash that arise directly from its operations. The Company is exposed to market risk, credit risk and liquidity risk.

The company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the company's financial performance. Risk management is carried out under policies approved by the Board of Directors.
